Administration Summary University of North Carolina at Greensboro

About This Consortium Report

Consortium Coordinator

Stephanie A. Herrera, Executive Director, Association for the Advancement of Sustainability in Higher

Education, stephanie.herrera@aashe.org

Comparison Group

This section summarizes how your consortium comparison group was identified, including selection criteria and whether the default option was taken. This is followed by the resulting list of institutions represented in the 'SustainEC' column of this report.

| Group label | SustainEC |
|--|--|
| Date submitted | 6/9/15 |
| How was this comparison group constructed? | Your institution retained the default comparison group (all consortium participants). |
| Group description | All other current- and prior-year NSSE institutions sharing your NSSE consortium "Sustainability Education Consortium" |

SustainEC (N=16)

Appalachian State University (Boone, NC)

Aquinas College (Grand Rapids, MI)

College of New Jersey, The (Ewing, NJ)

Dickinson College (Carlisle, PA)

Eastern Mennonite University (Harrisonburg, VA)

Hamline University (Saint Paul, MN)

Louisiana State University and Agricultural & Mechanical College (Baton Rouge, LA)

Missouri State University (Springfield, MO)

Northland College (Ashland, WI)

Philadelphia University (Philadelphia, PA)

Plymouth State University (Plymouth, NH)

Pratt Institute (Brooklyn, NY)

Southwestern University (Georgetown, TX)

University of Central Oklahoma (Edmond, OK)

University of North Carolina at Asheville (Asheville, NC)

University of the District of Columbia (Washington, DC)

University of North Carolina at Greensboro

Endnotes

- a. Column percentages are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Percentages may not sum to 100 due to rounding. Counts are unweighted; column percentages cannot be replicated from counts.
- b. All statistics are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Unless otherwise noted, statistical comparisons are two-tailed independent t-tests. Items with categorical response sets are left blank.
- c. These are the values used to calculate means. For the majority of items, these values match the codes in the data file and codebook.
- d. Effect size for independent t-tests uses Cohen's d.
- e. Statistics are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Categorical items are not listed.
- f. The 95% confidence interval for the population mean is equal to the sample mean plus or minus 1.96 times the standard error of the mean.
- g. A measure of the amount individual scores deviate from the mean of all the scores in the distribution.
- h. Degrees of freedom used to compute the t-tests. Values differ from Ns due to weighting and whether equal variances were assumed.
- i. Statistical comparisons are two-tailed independent *t*-tests. Statistical significance represents the probability that the difference between your students' mean and that of the comparison group is due to chance.

Key to symbols:

- **Your students' average** was significantly higher (p < .05) with an effect size at least .3 in magnitude.
- Your students' average was significantly higher (p < .05) with an effect size less than .3 in magnitude.</p>
- ∇ Your students' average was significantly lower (p < .05) with an effect size less than .3 in magnitude.
- **Your students' average** was significantly lower (p < .05) with an effect size at least .3 in magnitude.

Note: It is important to interpret the direction of differences relative to item wording and your institutional context.
